Key

- National policy
- Interim COVID-19 policy

References

Click on the ovals in the table to access the referenced policy.

Notes

Ghana: NCD treatment to be provided through same DSD for HIV treatment models for the same duration refill if available

Mozambique: The interim COVID-19 policy states that where possible, NCD treatment must be integrated with ART refills (3MMD)

South Africa: NCD (hypertension and diabetes treatment) fully integrated into DSD for HIV treatment models with same refill duration

Uganda: Those with other chronic co-morbidities (hypertension, diabetes, cardiac diseases, and renal diseases) can be considered established on treatment if their co-morbidities are controlled. COVID-19 policy enables alignment of NCD (diabetes and hypertension) treatment and ART refill durations

Zimbabwe: Clinical and NCD treatment refills aligned with DSD in normal policy, COVID-19 policy notes that clients with diabetes, cancer, hypertension and other cardiovascular conditions should be prioritized for MMD
