10TH IAS CONFERENCE ON HIV SCIENCE

Mexico City, Mexico  21-24 July 2019

OBJECTIVES

- Share the current evidence
- Highlight the barriers and structure
- Present best-practice interventions and research
- Debate and discuss what the next steps
- Bring the conversation about men and HIV to the forefront ahead of IAS 2019

FORUM AGENDA

Opening
welcome

Where we
are and
how we got
here

Case
studies 1

Discussion
– what we
know and
what we
don't

Have your
say

Case
studies 2

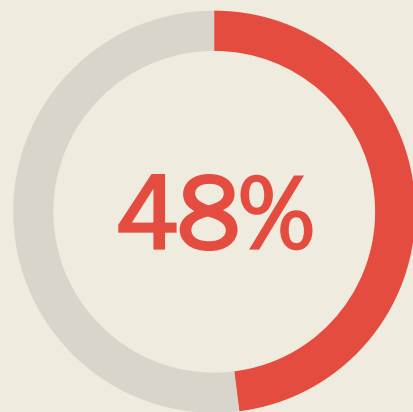

Discussion -
Where to
from here

FRAMING MEN'S HEALTH

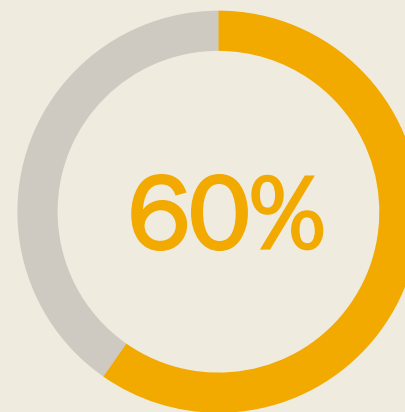

- Discuss health systems changes or adaptations that should be considered to **better reach men where they are**.
- **Avoid the frames** of “men as a problem” or “how to change men”.
- **Focus on interventions to reach men and improve men's health as an end in itself**, rather than interventions to reach men as a means of improving outcomes for women or addressing other social issues.

WHY A “MEN & HIV FORUM”?

Living with HIV

Globally, 48% of adults living with HIV are men
