Witwatersrand
South Africa

IAS 2025

Background

- DSD for HIV treatment has experienced significant scale-up over the past decade
- A DSD approach can offer additional opportunities within the HIV care cascade
- A DSD approach to non-communicable disease service delivery can promote sustained adherence and effective management
- It is imperative to acknowledge the valuable contributions of DSD in reducing the burden of HIV care on the health system and ensuring its continued integration

SCOPE FOR SUBMISSIONS:

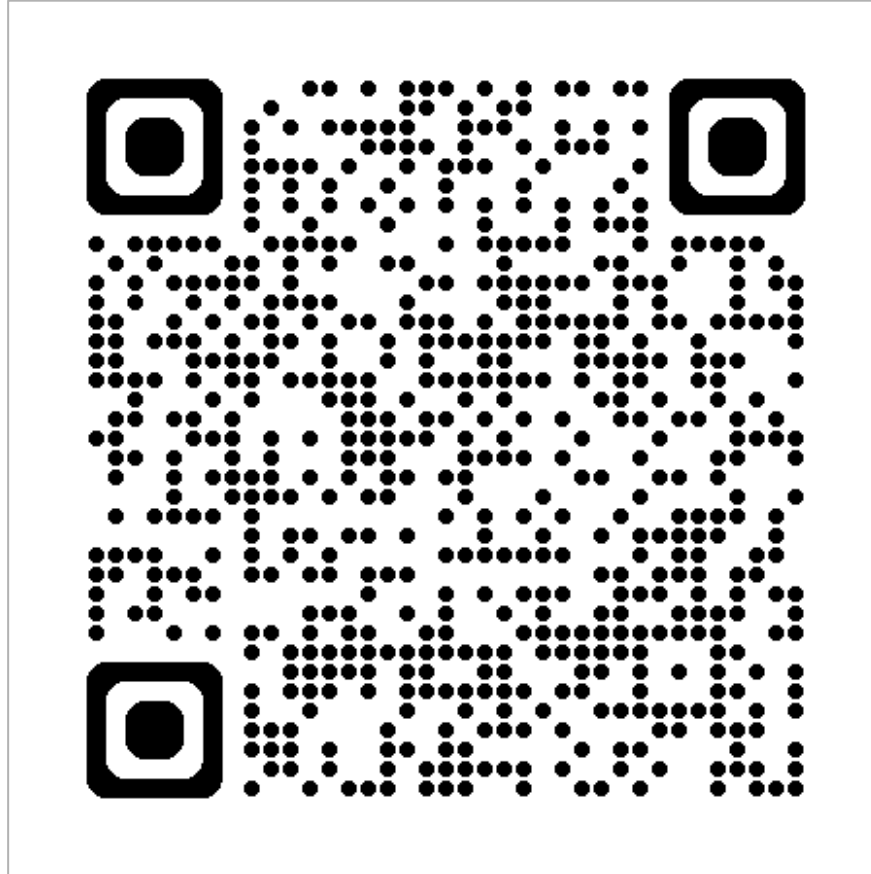

- DSD for PrEP
- DSD for PEP
- DSD for advanced HIV disease
- DSD for specific populations
- DSD for HIV treatment alongside integration of other health needs
- DSD for other health conditions

IAS 2025

Key themes of the supplement

- DSD for HIV treatment alongside other health needs
- DSD for other chronic conditions
- Extending DSD to often-overlooked populations
- DSD for PrEP
- Scale & future

Today's presentations:

- Aligning HIV treatment and hypertension clinic visits and dispensing as a first step toward service delivery integration in South Africa
- High acceptability, feasibility, and sustainability of a direct-to-pharmacy differentiated PrEP delivery model in public health HIV clinics in Kenya: Perspectives of PrEP clients and healthcare providers
- The need to differentiate at re-engagement: Lessons from South Africa and Zimbabwe's re-engagement algorithms
- A prospective cohort study of the SEARCH integrated HIV/hypertension community health worker-led intervention in rural Kenya and Uganda

Session overview

Aligning HIV treatment and hypertension clinic visits and dispensing as a first step toward service delivery integration in South Africa, Oratile Mokgethi (University of the Witwatersrand, South Africa)

High acceptability, feasibility, and sustainability of a direct-to-pharmacy differentiated PrEP delivery model in public health HIV clinics in Kenya: Perspectives of PrEP clients and healthcare providers, Emmah Owidi (Kenya Medical Research Institute, Kenya)

The need to differentiate at re-engagement: Lessons from South Africa and Zimbabwe's re-engagement algorithms, Lynne Wilkinson (IAS, South Africa)

A prospective cohort study of the SEARCH integrated HIV/hypertension community health worker-led intervention in rural Kenya and Uganda, Matthew Hickey (UCSF, United States)
