

Setting the context: Prioritization under pressure

 **AIDS 2026**

Prioritization under pressure: Rethinking HIV service delivery with TIER-Plus
Anna Grimsrud, IAS
27 July 2026

What if this isn't
the storm...

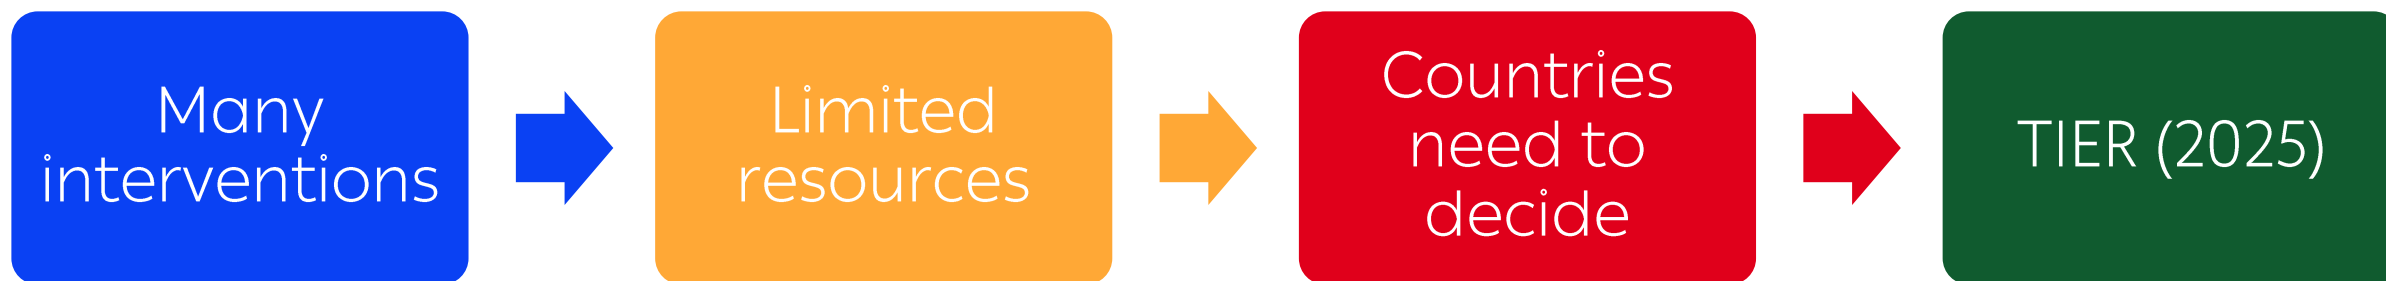

...what if it's the
climate?

Supporting countries prioritize

 **AIDS 2026**

Tool for
Intervention
Evaluation and
Ranking

Countries - and communities - used TIER

- Versions of the TIER were used by at least 21 countries

- COMPASS partners adapted the TIER tool to develop a, "TIER-Community Prioritization Tool" for HIV, TB, Malaria, NCDs and pandemics
 - For example, in Tanzania, circulated draft to community service organizations to determine the prioritization of the interventions and used their TIER to engage regarding prioritization with the Global Fund, PEPFAR and national government

Prioritization became a shared conversation rather than a technical exercise.

 **AIDS 2026**

**"Show us
the impact"**

TIER could identify priorities.....but not quantify their impact.

From prioritization to potential impact

Enter TIER-Plus

- Compare scenarios.
- Estimate outcomes.
- Understand trade-offs.

Designed to be openly available — not just for select stakeholders.
