

Example policy 2

Country suitability criteria for PrEP access

July 2022

PrEP should be offered and made available to all people weighing over 35kg without clinical contra-indications, who self-identify as being at ongoing risk of HIV acquisition and who are willing to take PrEP as prescribed. Pregnant and breastfeeding people are explicitly included.

This policy example is linked to the publication, "IAS - the International AIDS Society. *Key considerations in developing policy guidance for differentiated PrEP service delivery: Country policy development brief*. July 2022." available at <https://www.differentiatedservicedelivery.org/Resources/Resource-Library/DSD-PrEP-policy-2022>
