

AIDS 2026

Differentiated Service Delivery (DSD) Roadmap for AIDS 2026

Version 30 June 2026

*All times local time Rio de Janeiro, Brazil (GMT-3)

Live sessions (pre-conferences, satellites, symposia and oral abstract sessions)

Sunday, 26 July 2026

PRE-CONFERENCES

HIV Treatment at a Crossroads: Community Power in the Age of Austerity and Algorithms

Organizer: IPTC; Room: 205

- Session 1: [Treatment at a Crossroads: Crisis, Power, and the State of the Movement](#), 08:00-09:00.
- Session 2: [HIV Treatment at a Crossroads: Community Power in the Age of Austerity and Algorithms - From Evidence to Power: Community Data, Affordability, and the Fight for Treatment Access](#), 09:30 - 11:00.
- Session 3: [Algorithms, Platforms, and Power: Building Community Governance for the Future](#), 11:30 - 13:00.

Advancing HIV prevention science and access

Organizer: IAS – the International AIDS Society; Room 202

- Session 1: [Framing the future of HIV prevention: Progress, gaps, and the meaning of choice](#), 08:00 – 09:00
- Session 5: [Delivering prevention: From innovation to real-world choice](#), 15:30-17:00
- Session 6: [Session 6: Perspectives and priorities: What will change the course of the epidemic?](#), 17:30-19:00

12th Symposium on Children and Adolescents with Perinatal HIV Exposure

Organizer: IAS in collaboration with United Nations Children's Fund (UNICEF), Penta – Child Health Research, Mass General Hospital, Paediatric-Adolescent Treatment Africa (PATA); Room 205

26–31 July 2026 · Rio de Janeiro, Brazil

AIDS 2026

- Session 2: [Identifying risk and supporting families: Lessons from other programmes](#), 15:30 - 17:00
- Session 3: [Long-term follow-up: From data to action](#), 17:30 - 19:00

Monday, 27 July 2026

[Prioritization under pressure: Rethinking HIV service delivery with TIER-Plus](#), Satellite, 11:30 – 12:30, Room: 203, Organizer: IAS.

[No more silos: Integration as the pathway to resilient triple elimination and people-centered care](#), Satellite, 11:30 - 12:30, Room 201. Organized by PATH, Unitaaid, International Community of Women living with HIV Eastern Africa, World Hepatitis Alliance, World Health Organization

[WHO clinical, service delivery and surveillance updates: new recommendations for HIV and sexually transmitted infections](#), Satellite, 15:00-16:30, Room 201. Organized by the World Health Organization.

[Opening session](#). Official opening of AIDS 2026, 17:00-18:30, Room 101A.

Tuesday, 28 July 2026

[Rethink. Rebuild. Rise.](#), Plenary Session, 08:30-10:00, Room 101A

- Plenary: Delivering HIV services in a time of transition, Lloyd Mulenga, Ministry of Health, Zambia

[From insecurity to inequity: Examining structural drivers of HIV outcomes](#), Oral abstract session, 10:30-11:30, Room 202.

- [Early impact of funding withdrawal on HIV care and treatment programs in East Africa](#), Truong et al
- [Rethinking HIV prevention prioritization during funding crisis: evidence from rapid service declines among key populations in Nigeria](#), Magaji et al

[ARTistic strategies 1: From testing to treatment](#), Oral abstract session, 10:30-11:30, Room 101A.

- [Point of care viral load monitoring improves viral suppression at 6 months among children, adolescents and young people with HIV in East Africa: a cluster-randomized trial](#), Kikaire et al

[Community-led monitoring in conservative and restrictive environments: Strategies for influence and integration](#), Symposium, 10:30-11:30, Room 204.

AIDS 2026

[Responding to a new context and looking to 2030 and beyond: WHO frameworks for integrated and sustainable HIV, tuberculosis, hepatitis and STI responses](#), Satellite, 13:30-14:30, Room 202.

Organized by WHO.

[Protecting what works: Sustainable, integrated, key population-sensitive models balancing community-led and facility-based services](#), Workshop, 14:30-16:30, Room 101C. Organized by the World Health Organization.

[Economics of impact: Costing studies across the cascade](#), Oral abstract session, 15:00-16:00, Room 103.

- [Costing the implementation of 6MMD utilizing 6- and 12-month scripting in South Africa](#), Huber et al
- [Cost-effectiveness of implementing dual HIV/syphilis and triplex HIV/syphilis/HBV rapid diagnostic testing among pregnant women in Kenya and South Africa](#), Johnson et al

[Demedicalizing PrEP](#), Symposium, 15:00-16:00, Room 202.

[Two steps back, three steps forward: Communities in the lead](#), Oral abstract session, 16:30-17:30, Room 101A.

- [Rethink, rebuild, rise: strengthening HIV service quality and accountability through community-led monitoring in Lesotho](#), Makhooa et al

[Maximizing impact with integrated STI testing](#), Oral abstract session, 16:30-17:30, Room 201.

- [Beyond barriers: delivering comprehensive cervical cancer screening and treatment for women living with HIV via a remote static-outreach model in Mashonaland Central, Zimbabwe \(Oct 2023-Sep 2024\)](#), Murwira et al

[Adapting AHD for routine care and outbreak response: Country Implementation experiences](#), Satellite, 18:00-19:00, Room 204. Organized by Aurum Institute, Drugs for Neglected Diseases initiative, Unitaid.

[Reimagining PrEP delivery for youth through peer leadership and community insights](#), Satellite, 18:00 - 19:30, Room 101C. Organized by Federal University of Bahia, State University of Bahia, Fiocruz-Bahia, University of São Paulo, University of Alabama at Birmingham.

Wednesday, 29 July 2026

[AIDS 2026: Co-Chairs' Choice](#), Oral abstract session, 10:30-11:30, Room 101A.

- [Uptake, persistence and preference for long-acting injectable versus oral PrEP among Mobile Men in Uganda and South Africa: primary user effectiveness and implementation outcomes in the Mobile Men trial](#), Ruzagira et al
- [Measuring PEPFAR disruptions at scale: results from a 46-country implementing partner survey](#), Lankiewicz et al

26–31 July 2026 · Rio de Janeiro, Brazil

AIDS 2026

The future of HIV service delivery is...simplification, self-care, integration, and AI in practice, 12:00-13:00, Room: 201, Organized by the IAS.

Sustaining advanced HIV disease care: Lessons from program integration and country experiences, Satellite, 12:00-13:00, Room 202. Organized by Clinton Health Access Initiative.

HIV service delivery in conflict, humanitarian and development settings, Oral abstract session, 15:00-16:00, Room 101A.

Still running late: Advanced HIV disease, Oral abstract session, 16:30-17:30, Room 202.

- Advanced HIV disease and subsequent mortality and hospitalization among people living with HIV in South Africa, Mbeje et al
- Assessing implementation and expansion of advanced HIV disease in Malawi, Phiri et al

PrEP in motion, Oral abstract session, 16:30-17:30, Room 201.

- Effect of different pharmacy PEP delivery models on initiation, repeat use, and PEP-to-PrEP transition: findings from a 75-pharmacy cluster-randomized controlled trial in Kenya, Ngure et al

Unfinished business: Ending preventable deaths from advanced HIV disease in a changing HIV response, 18:00-19:30, Room: 103. Organized by the IAS.

Thursday, 30 July 2026

Practice and pathways: Integrated testing and screening as entry points to HIV care, Oral abstract session, 10:30-11:30, Room 204.

- Integrating STI self-testing as a scalable entry point to HIV prevention among adolescent girls and young women in Dar es Salaam: evidence from a community-led advocacy initiative, Zahabu et al
- Integrating HIV testing, ART initiation and cervical cancer screening in primary care: programmatic results from Mozambique, Uamba Tualufo et al
- From two community hubs to every Thai province: scaling a sex worker-led HIV self-testing distribution model across Thailand, Thepbinkarn et al

Status-neutral practice: Interventions for young people, Oral abstract session, 15:00-16:00, Room 203.

- Leveraging youth champions to enhance PrEP uptake among clients substantially vulnerable to HIV at South Lunzu health center, Blantyre, Malawi: a quality improvement initiative, Baila et al
- Empowering gen Z: peer-led digital campaign for HIV prevention and mental health among Thai youth, Manojai et al

AIDS 2026

- [Integrating U=U into HIV care for adolescents and young adults in Cape Town, South Africa: a randomized trial](#), Sineke et al

[Prevention in practice: Real-world advances in HIV prevention delivery](#), Oral abstract session, 16:30-17:30, Room 201

- [Real-world implementation of long-acting lenacapavir for HIV PrEP in Zambia: early programmatic outcomes from a phased rollout](#), Mulenga et al
- [Boosting youth uptake of HIV self-testing and pre-exposure prophylaxis via peer-led alternative access points in Greater Metro Manila, Philippines](#), Cabuso et al
- [Patterns of PrEP and PEP use through automated dispensing machines in São Paulo, Brazil: modality, motivations, and gender differences](#), Queiroz da Silva et al

Friday, 31 July 2026

[The cost of cuts: Human and systems impacts on the HIV response](#), Oral abstract session, 10:30-11:30, Room 203.

- [Impact of PEPFAR funding cuts on HIV program performance and outcomes in sub-Saharan Africa: a systematic review](#), Luke et al
- [Lessons from the global fund GC7 reprioritisation process: implications for community-led HIV responses](#), Ogunkola et al
- [Impact of funding interruptions on the HIV response in Maputo City: an operational and statistical evidence \(2023-2025\)](#), Magaia de Abreu et al
- [Antiretroviral delivery performance following Global Fund procurement restructuring: a 17-year interrupted time series analysis across 125 countries](#), Nurmsoo et al

[Syndemics in practice: Supporting people living with HIV and other conditions](#), Oral abstract session, 12:00-13:00, Room 103.

- [Integrated community-based care versus facility-based integrated care for people living with HIV, diabetes or hypertension in sub-Saharan Africa \(INTE-COMM\): a multi-country cluster-randomised trial](#), Kasujja et al
- [Community-led one-stop-shop for integrated communicable disease and NCD diagnostics and monitoring: digital case management for key populations in Moldova](#), Poverga et al
- [Hearing the voice of the people: impact of integration of hypertension care into HIV clinics in Botswana on improving experiential quality](#), Mosepele et al
- [Challenges in integrating cervical cancer and HIV services: experiences of women accessing care in Nairobi, Kenya](#), Kigen et al

AIDS 2026

Practice and partnerships: Community roles in driving HIV service delivery, Oral abstract session, Room 203, 13:30-14:30

- Adaptive, safety-centered HIV service delivery for men who have sex with men in Ghana amid escalating anti-LGBTQ+ pressures: a pre-post evaluation of case-finding and linkage outcomes, Owusu et al
- A beautiful choice: transgender-led differentiated HIV testing and prevention through beauty salon owners and beauticians in the Philippines, Laguing et al
- Impact of community-based interventions on viral load among adolescents and young adults living with HIV, Carras-Terzian et al
- Transforming prevention landscapes: community-led implementation of lenacapavir (LEN) in Nairobi, Kamau et al

It is still TB: The unfinished battle, Oral abstract session, Room

- Tuberculosis amidst the high tide of antiretroviral therapy interruptions: a retrospective cohort study in South Africa, Moolla et al

Poster exhibition

The posters are listed by day of presentation within the following six categories:

1. HIV testing
2. HIV prevention
3. HIV treatment
4. Integrated care
5. Advanced HIV disease (AHD)
6. Impact of funding cuts

1. HIV testing

Tuesday, 28 July

- Differentiated testing modalities by age group to strengthen pediatric case finding: a global data analysis, Casalini et al

Thursday, 30 July

- Beyond the hotspot: achieving a 22% HIV positivity yield through peer-led, differentiated outreach segmentation among hidden MSM in Ghana, Owusu et al

AIDS 2026

- [Community-first HIV testing at scale in Cameroon: 18-month GC7 results and the case for integrated harm reduction for PWID](#), Nang Nang et al

2. HIV prevention

Wednesday, 29 July

- [Scaling up HIV prevention: community-led, decentralized, and differentiated interventions for PWID in India](#), Biswas et al
- [Early programmatic insights into routine long-acting lenacapavir delivery for HIV prevention: differentiated implementation in Eswatini](#), Kerschberger et al
- [Beyond the clinic wall: building a youth-centered PrEP delivery ecosystem through differentiated HIV prevention service delivery models](#), Potsane et al
- [Integrating pre-exposure prophylaxis into postnatal care: service delivery, risk perception, and uptake among breastfeeding women in South Africa](#), Wessels et al

Thursday, 30 July

- [Impact of differentiated service delivery models on equity in oral PrEP access in Brazil's unified health system: a national analysis, 2018–2024](#), Brittes Kamiensky et al
- [Assessing implementation fidelity of differentiated PrEP support strategies among young women in South Africa](#), Chase et al
- [Differentiated PrEP service delivery to reduce HIV incidence and advance elimination in Latin America and the Caribbean](#), Clemente Bermúdez et al
- [Addressing the postnatal "last mile" of vertical HIV transmission through integrated postnatal care in South Africa](#), Feucht et al
- [Person-centered community approaches linked to reduced rates of mother-to-child HIV transmission in Angola: lessons from differentiated PMTCT services](#), Machisa et al

3. HIV treatment

Tuesday, 28 July

- [Influence of community-based differentiated care approaches on viral load monitoring among key populations living with HIV in Kwara State, North-Central Nigeria](#), Ashivor et al
- [Tenofovir diphosphate thresholds accurately predict concurrent viraemia in people living with HIV taking tenofovir disoproxil fumarate, lamivudine and dolutegravir](#), Dorward et al
- [Home-based counseling and ART initiation increase viral suppression among men out of care in Malawi: randomized trial](#), Dovel et al
- [Sustaining zero interruptions in treatment among people living with HIV in Bayelsa State, Nigeria: a retrospective cohort study](#), Golbador et al

AIDS 2026

- [Are differentiated service delivery models effective for adolescents \(aged 10-19\) living with HIV? A systematic review of evidence from Eastern and Southern Africa](#), Kaakyo et al
- [Early viral load monitoring and enrollment into multi-month dispensing models following South Africa's 2023 revision of HIV treatment guidelines](#), Kachingwe et al
- [Providers prefer frequent contact over flexibility to reduce risk of early disengagement from HIV care in South Africa](#), Kachingwe et al
- [Costs of an adaptive HIV treatment strategy and differentiated service delivery for persons living with HIV in South Africa: results from the SMART ART study](#), Klein et al
- [From feasibility to scale: the rapid assessment that guided national implementation of six-month multi-month dispensing \(6MMD\) in South Africa](#), Mkhize et al
- [Diagnostic accuracy of a point-of-care urine tenofovir test, and associations between measures of tenofovir and treatment outcomes in a community antiretroviral therapy delivery programme](#), Naidu et al
- [Community-led differentiated HIV care in crisis-affected rural Bamenda: a mixed-methods implementation study](#), Wacha et al

Wednesday, 29 July

- [Client-provider interactions, cyclical interruptions in treatment, and the role of positive relationship building in treatment adherence and retention among men living with HIV in Malawi: a qualitative study](#), Edwards et al
- [Does HIV-related stigma affect preferences for differentiated HIV service models in Kenya? Evidence from a hybrid choice model](#), Kim et al
- [Predictors and self-reported causes of treatment interruption among clients on antiretroviral therapy in Malawi: a nested case-control study](#), Lemani et al
- [Closing the gap: accelerating ART initiation and re-engagement toward 95-95-95 targets in South Africa](#), Manganye et al
- [Lessons learned from the phased rollout of six-month multi-month dispensing \(6MMD\) of antiretroviral therapy in South Africa](#), Mkhize et al
- [From queues to confidence: national implementation of six-month multi-month dispensing \(6MMD\) in South Africa](#), Mkhize et al
- [Borderline access: assessing the quality of differentiated, client-centered HIV service delivery for gay, bisexual, trans, and queer sex workers living with HIV in Lagos, Nigeria](#), Oyeniyi et al
- [Rethinking entry and access to care: AI-enabled self-care as HIV service infrastructure](#), Rech et al

AIDS 2026

Thursday, 30 July

- [Engagement in care and viral load outcomes in the first 6 months after ART initiation: evidence from 18 South African clinics](#), Benade et al
- [Community-based tracking and re-engagement in HIV treatment among people experiencing treatment interruptions: programmatic outcomes from a multi-district initiative in Eswatini](#), Ginindza et al
- [Leveraging integrated digital health systems to reduce community health worker reporting burden and strengthen differentiated HIV service delivery in Malaysia](#), Ibnu Najah et al
- [Co-developing mobility-responsive interventions to reduce interruption in HIV treatment in Malawi](#), Lungu et al
- [Client segments for differentiated HIV and SRH service delivery among adolescents and young people \(AYP\) in Kenya](#), Masete et al
- [Differentiated service delivery for ART in rural South Africa: healthcare workers' and people living with HIV perspectives on implementation and impact](#), Ntinga et al
- [Determinants of ART disengagement: findings from a South African study of PLHIV who interrupt treatment](#), Pienaar et al

4. Integrated care

Tuesday, 28 July

- [Feasibility and preliminary effectiveness of a multicomponent intervention for blood pressure screening among people living with HIV at community pharmacies in Kampala, Uganda: a hybrid type 1 mixed-methods study](#), Musimbaggio et al
- [Integrating HIV and non-communicable disease services in primary healthcare: impact on diabetes mellitus screening, care, and reporting among people living with HIV in Uganda](#), Nuwagira et al

Thursday, 30 July

- [Digitalization of the YAPs model to strengthen integration of mental health and contraceptive access for young people living with HIV in Kampala -Uganda](#), Aanyu et al
- [Premium discreet, community-led HIV services as a strategy for differentiated care: evaluating the Luxecare model by LoveYourself](#), Cebrano et al
- [One stop integrated health services for female sex workers: HIV prevention, STI screening, family planning and mental health support in Cameroon](#), Estelle et al
- [The longitudinal care cascade for hypertension: a clinic-based study of people with and without HIV in South Africa](#), Gumede et al

AIDS 2026

- [Uptake of contraception services among adolescent girls and young women living with and not living HIV in South Africa: impact of a combination HIV prevention intervention](#), Jonas et al
- [Nurse-led mobile health units to strengthen HIV, syphilis, and viral hepatitis care in vulnerable urban settings in Rio de Janeiro, Brazil](#), Perazzo et al

5. Advanced HIV disease

Tuesday, 28 July

- [Turning the tide: integrating advanced HIV disease \(AHD\) management in South Africa's 2025 consolidated ART guidelines](#), Manganye et al
- [Trends in advanced HIV disease at antiretroviral therapy initiation in south africa, 2021–2025: provincial variations in CD4-based assessment after integration of advanced HIV disease management into national guidelines](#), Molapo et al

Wednesday, 29 July

- [Implementing an advanced HIV disease program in Côte d'Ivoire: challenges and successes from 2022 to 2024](#), Gourou et al
- [Informing scale-up of Kenya's advanced HIV disease package of care: an assessment of early implementation](#), Mayi et al
- [Health communication between clients with advanced HIV disease and their healthcare providers in Zambia](#), Sivile et al

Thursday, 30 July

- [AHD health facility prioritization: a multi-factor analysis from Malawi](#), Balakasi et al
- [Scaling up integrated advanced HIV disease \(AHD\) care in DRC: lessons from implementing a hub- and-spokes model](#), Ingwe et al
- [Twenty-four-month survival among clients with cryptococcal antigenemia enrolled in Malawi's advanced HIV disease program: a retrospective cohort study](#), Makonokaya et al
- [National geospatial mapping of advanced HIV disease \(AHD\) in South Africa: identifying hotspots for prioritised intervention](#), Shuping et al
- [The last mile+: a community-led model for closing advanced HIV disease service gaps in insecure settings in Nigeria](#), Suleiman et al

6. Impact of funding cuts

Tuesday, 28 July

- [Retention in HIV and related services among young women living with HIV using mentor mother services during funding disruptions in Ghana](#), Afriyie et al

26–31 July 2026 · Rio de Janeiro, Brazil

AIDS 2026

- [Uptake of a paid tele-health service for key populations following funding cuts in South Africa](#), Brown et al
- [Zimbabwe's institutionalisation of HIV programmes: a practical model for sustainability in uncertain funding environments](#), Dhodho et al
- [Rethink, rebuild, rise: centering young people living with HIV in the integration of HIV services into Tanzania's broader health system amid a funding crisis](#), Komba et al
- [The devastating ripple effects: assessing the impact of funding withdrawal on a community-based HIV prevention and treatment program in rural Uganda](#), Nanyange et al
- [Impacts of PEPFAR funding shifts on staffing and waiting times in South Africa: findings from Ritshidze community-led monitoring](#), Rambau et al
- [Impact of the 2025 U.S. global health funding shift on access to HIV services for MSM and gender-diverse people in Kampala and Wakiso Districts, Uganda](#), Ssenabulya et al
- [Sustaining epidemic control with less: Zimbabwe's tiered approach to HIV service prioritisation during funding transitions](#), Pindiwe et al

Wednesday, 29 July

- [HIV service delivery during 2025 donor funding disruptions: analysis of routinely collected national programme data](#), Chirwa et al
- [A qualitative assessment of program adaptations response in PEPFAR-supported countries during the limited life-saving waiver period](#), Choongo et al
- [Effect of donor funding disruptions on HIV data capture in four South African districts](#), Huber et al
- [Are clinic waiting times longer? Client perspectives on changes to waiting time and satisfaction with health services after global funding cuts in Zambia](#), Lekodeba et al
- [Who leads when funding shifts? Global insights from PLHIV leadership on sustaining HIV treatment, integration, and prevention beyond 2030](#), Njarattil Parameswaran
- [What did we learn from the most recent funding cuts: Eswatini experience](#), Ngcamphalala et al
- [Integrating HIV services into primary health care in South Africa: opportunities and challenges post-funding cuts](#), Radebe et al
- [Provincial-level impacts of PEPFAR funding shifts on HIV services in South Africa: findings from Ritshidze community-led monitoring](#), Rutter et al
- ["The services were scrapped..." Explorations of 2025 funding cuts and impacts on HIV prevention services for pregnant and postpartum women in southwestern Uganda](#), Smith et al
- [Assessing Mozambique's HIV financing ecosystem amid declining donor support: lessons from a national task force](#), Uetela et al

AIDS 2026

Thursday, 30 July

- [The effect of an unplanned funding shock on a donor-supported HIV testing workforce: evidence from Malawi's national program](#), Chirwa et al
- [Effects of global HIV funding shifts on donor-supported staffing and HIV service delivery in South African primary healthcare facilities](#), Kachingwe et al
- [When the funding stopped: a national analysis of HIV service disruption in Kenya](#), Kibisu et al
- [The impact of the U.S. funding cuts on tailored HIV treatment services for men who have sex with men \(MSM\) in Johannesburg, South Africa](#), Lebona et al
- [Navigating HIV service integration amid funding cuts: a case study of the USAID Fahari ya Jamii Program in Nairobi and Kajjado counties](#), Njagi et al
- [Disrupted health access: the impact of PEPFAR funding cuts on HIV service delivery in South Africa](#), Ntini et al
- [The immediate impact of the 2025 PEPFAR funding freeze on HIV prevention service delivery in Nigeria](#), Ogunbayo et al
- [Trends in the quality of HIV service delivery following the suspension of PEPFAR support in Mozambique](#), Paulo et al
- [Impact of U.S. funding suspension on viral suppression among men who have sex with men \(MSM\) in Nigeria: a retrospective cohort study](#), Umoh et al

E-posters

1. HIV testing

- [Optimizing case finding through multiple HIV self-test distribution channels: reporting and linkage outcomes from the promoting access to HIV self-testing \(PATHS II\) project in three Nigeria states](#), Adole et al
- [Association between HIV self-testing and CD4 levels at initiation of HIV antiretroviral treatment in four regions of Tanzania, 2025](#), Damian et al
- [Re-testing policy as an opportunity to re-engage HIV treatment interrupters in Malawi's national HIV program](#), Ng`ona et al

2. HIV treatment

- [Strengthening client-centered health service delivery using the routine client feedback initiative: the Lango experience, Uganda](#), Basiima et al

AIDS 2026

- [Optimizing HIV service delivery through multi-month dispensing of antiretroviral therapy beyond 6 months and biennial viral load monitoring: evidence from the national electronic medical record system in Zambia, 2020–2025](#), Demeke et al
- [Agentic AI and federated learning for real-time optimization of differentiated HIV service delivery: an implementation and economic systems framework](#), Fowosere et al
- [Acceptability of near point-of-care viral load monitoring among adolescents and young people living with HIV in East Africa](#), Mtenga et al

3. Integrated care

- [Projected diabetes burden and cost-effectiveness of integrated metabolic prevention among adults on antiretroviral therapy in Nigeria: an individual-level microsimulation modelling study](#), Isah et al
- [Healthcare stigma and HIV/STI prevention service uptake among cisgender men and gender diverse individuals who have sex with men in five Asian countries: implications for differentiated service delivery](#), Miwa et al
- [Assessment of a client-centered service model on integrated point-of-care TB-HIV services and tuberculosis preventive treatment completion among people living with HIV](#), Monton et al
- [High-coverage telehealth education for HIV-related NCD comorbidities in Siha District clinic setting](#), Mteki et al
- [Trends in screening for tuberculosis \(TB\) preventive treatment eligibility and utilization among adolescents and young people living with HIV in Zimbabwe, 2023-2025](#), Nkomo et al
- [Impact of geriatric club on hypertension management among elderly HIV patients at Otjiwarongo ART hospital](#), Tshimwanga et al

4. Impact of funding cuts

- [Early health system effects of U.S. government funding disruptions on PrEP service delivery in public clinics in Kisumu, Kenya: evidence from longitudinal technical assistance data](#), Kwach et al
- [Impact of USAID funding cuts on PrEP continuity and sexual health among key populations in Nigeria](#), Ogamba et al
