

The Philippine HIV and AIDS CBOs Response to the Pandemic: #ARVAYANIHAN

- 53 Million Filipinos were placed under enhanced community quarantine (ECQ) for more than 90 days

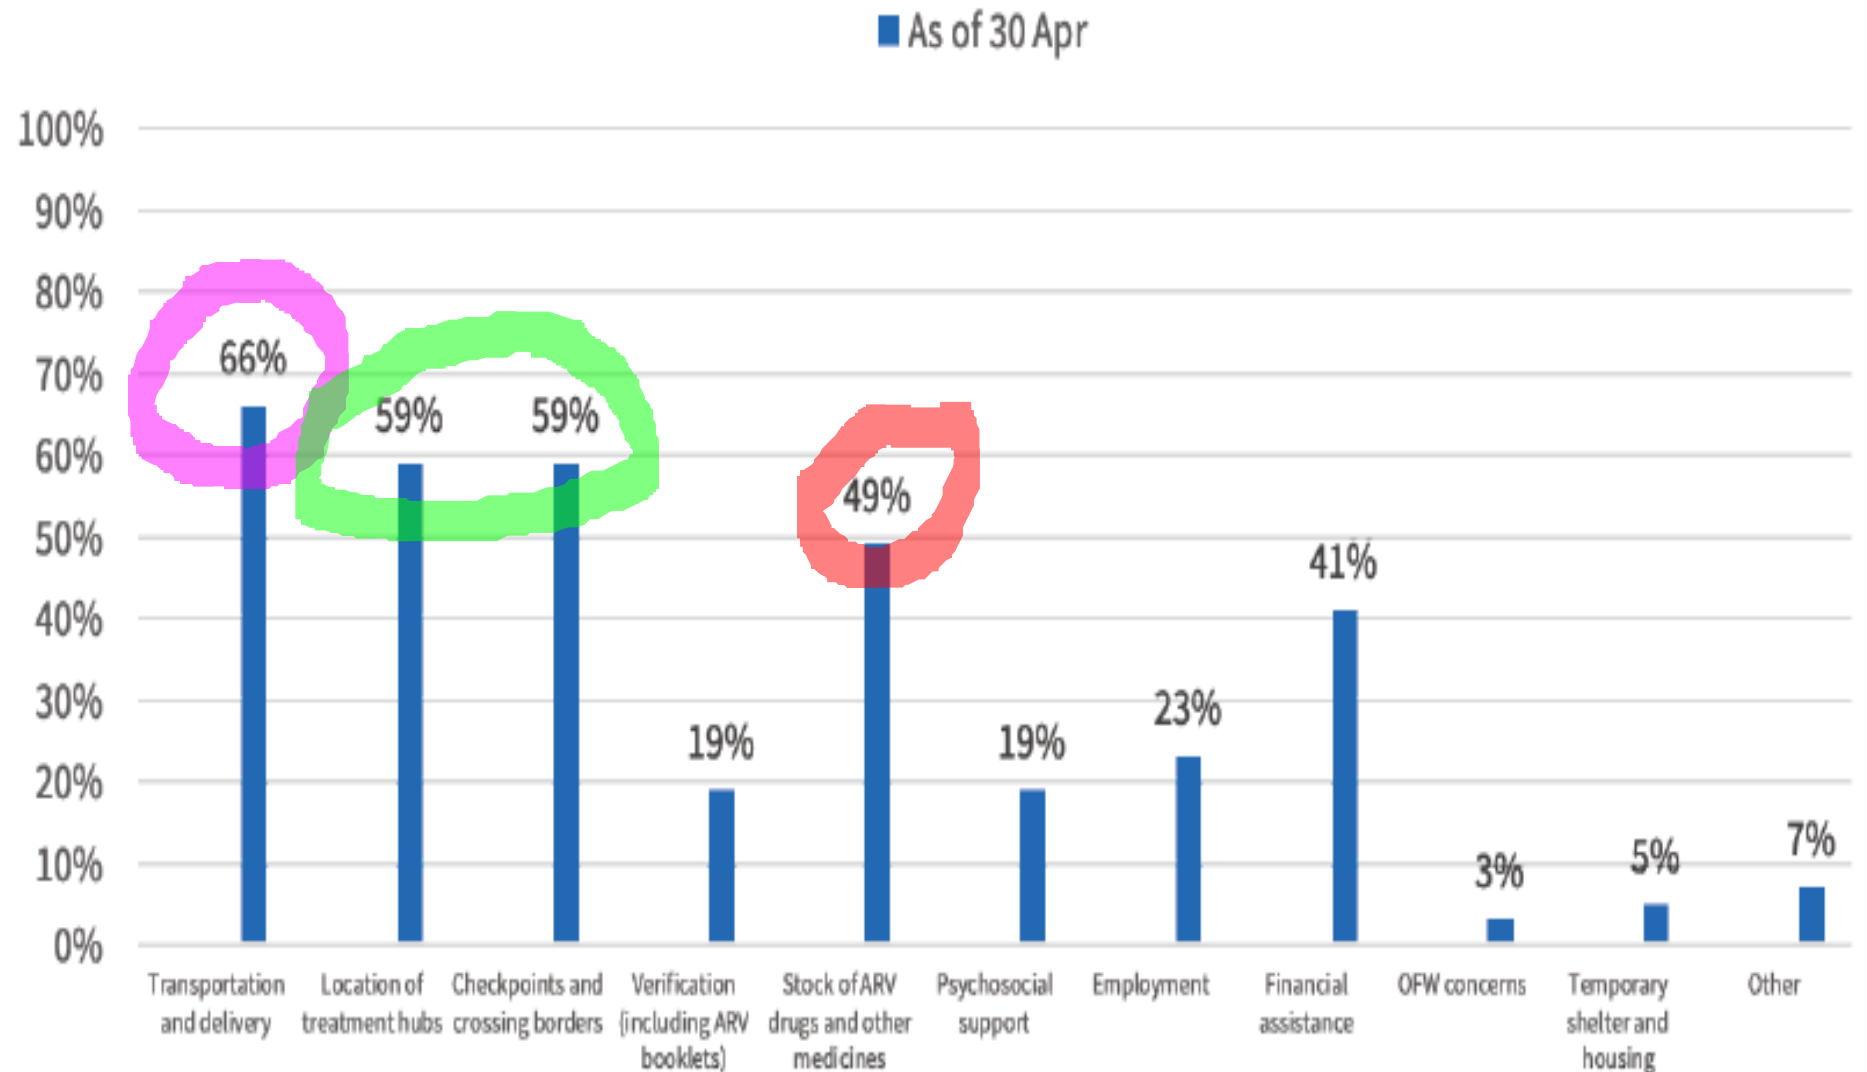

- Massive exodus from Metro Manila to nearby provinces and regions

- No public transportation
- Businesses, factories and companies ceased operations
- Schools were suspended
- Most government institutions went on partial shut down or temporarily closed

Figure 1. Distribution of reported PLHIV concerns during the COVID-19 crisis

Stages of the response

- Pre-lockdown preparation
 - Development of COVID-19 Protocol or Operation
- Lockdown Actions
 - Quick Response
 - Mapping/ Survey
 - Mobilization of Network (N+, NSAP, Dangkal Pilipinas etc.)
 - Establishment of a protocol or algorithm for delivery and monitoring
 - Partnership
 - Mobilization of resources for far flung regions
- Institutionalization of Surge Response Capability in Crisis Situation

*Working together for
worry-free ARV delivery.*
