

 **IAS 2021**

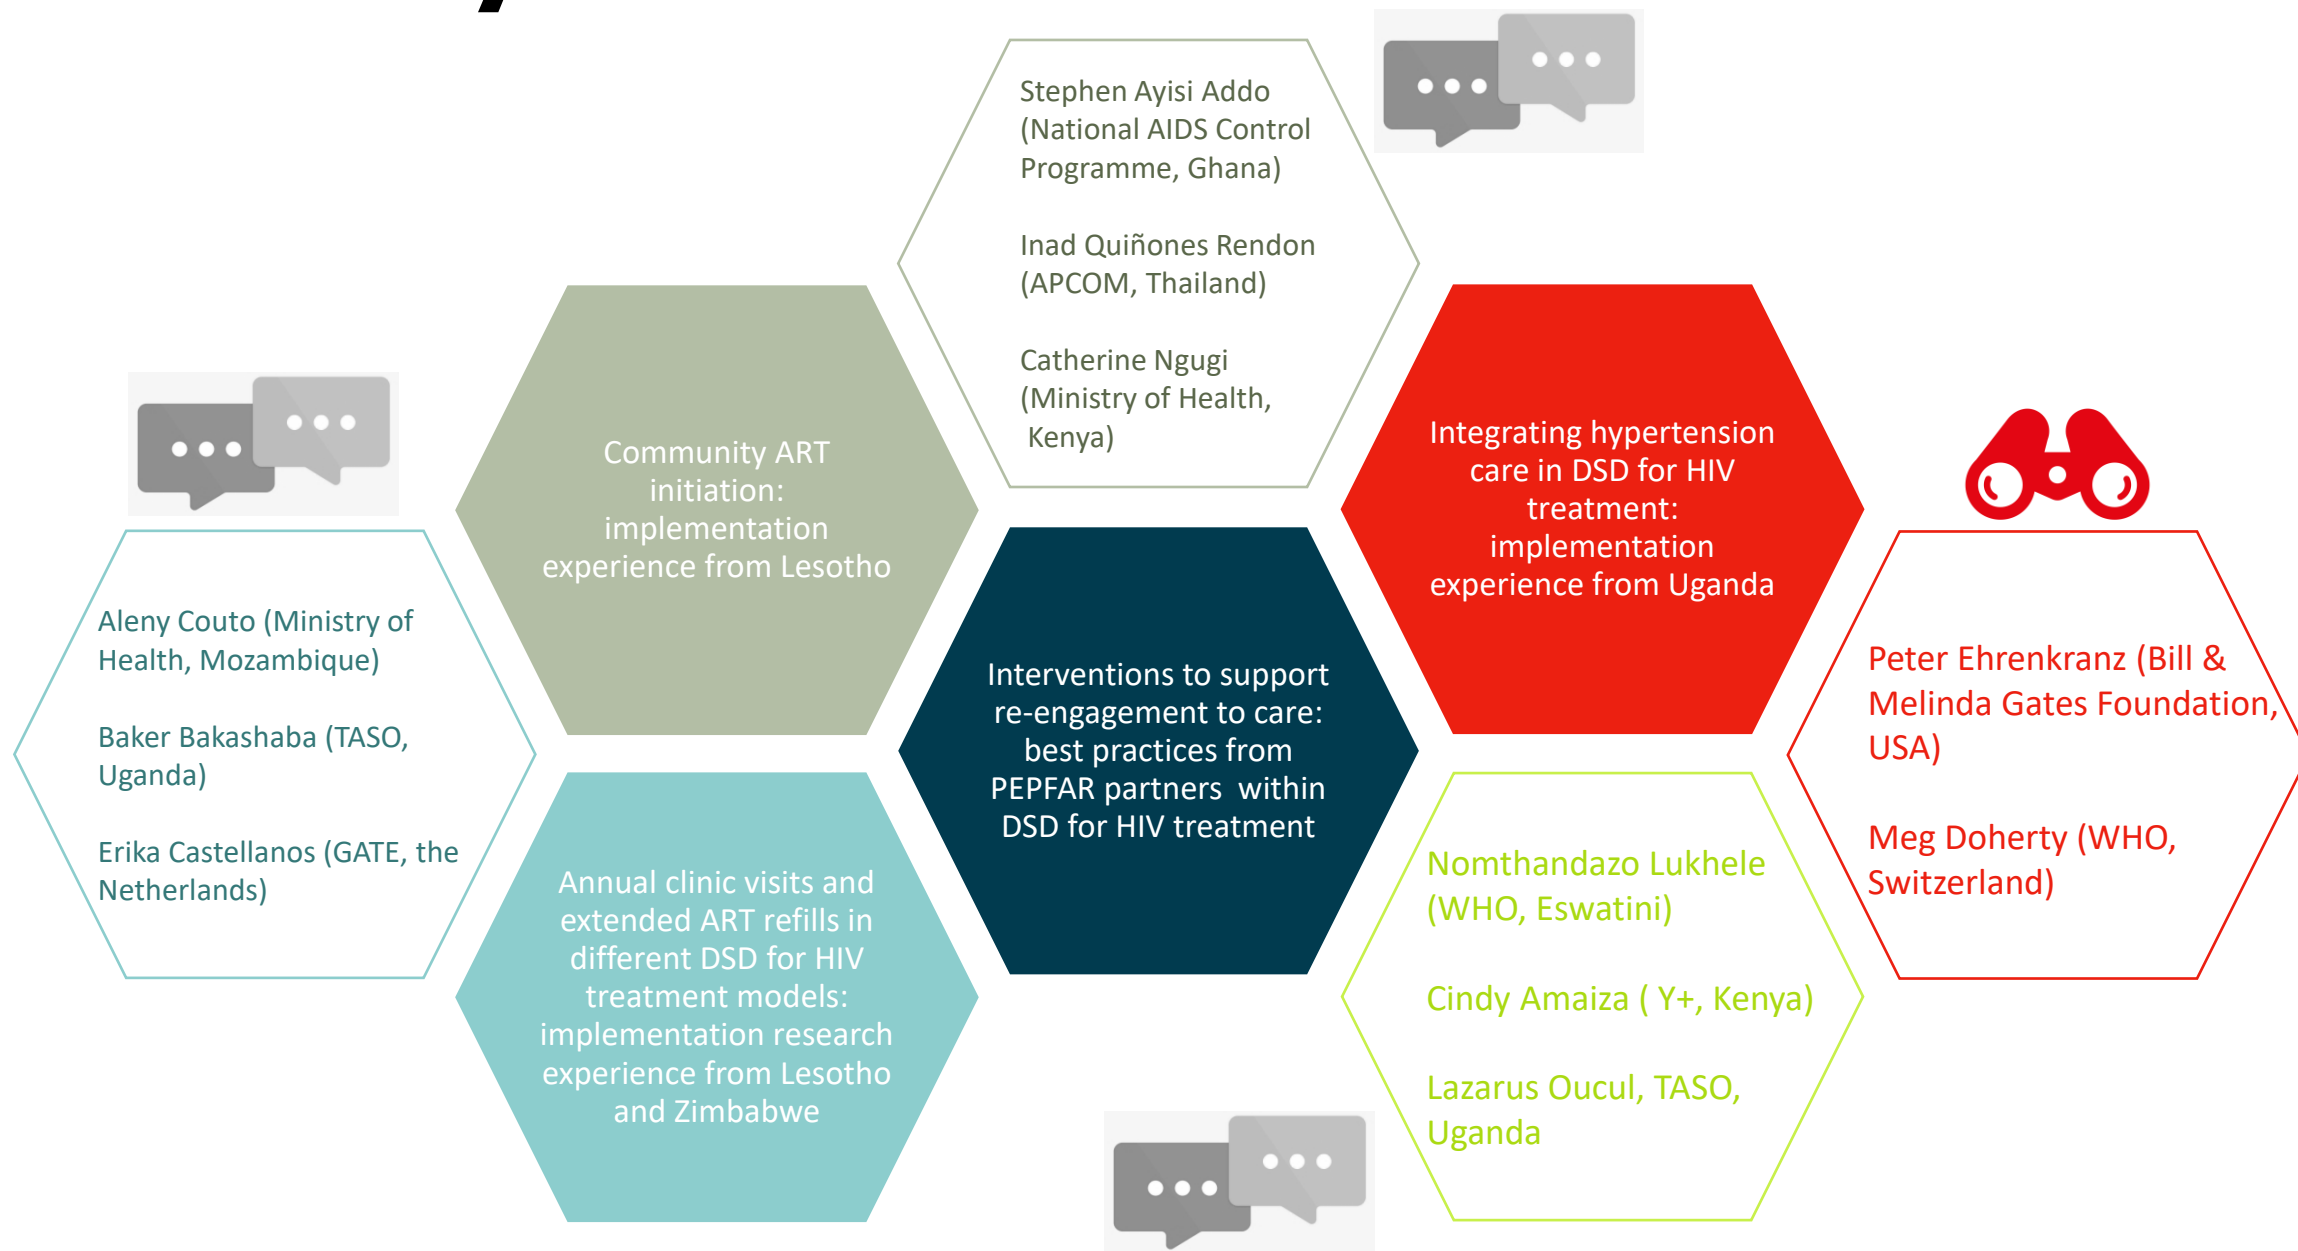

# Wrap up

What's new in DSD for HIV treatment: from WHO recommendations to reality

Nathan Ford, World Health Organization, Switzerland

Anna Grimsrud, IAS – the International AIDS Society, South Africa

# Summary of the session

# Key takeaways

1. Research and implementation gaps in integrating TB (including TPT), NCD and family planning within DSD for HIV treatment models
2. Need more “best practice” examples of how to support re-engagement
3. There is momentum for DSD to be expanded beyond DSD for HIV treatment for those established on treatment

# Next steps

1. MINISTRIES OF HEALTH - Countries should consider updating national guidance adopting revised WHO guidance and incorporating adaptations made in response to COVID-19
2. GLOBAL HIV COMMUNITY – Moving from DSD for HIV treatment towards self-care
3. RESEARCHERS – Quantify the value of sustained adoption of measures introduced as part of the emergency COVID-19 response and more implementation research on supporting re-engagement

# DSD roadmap for IAS 2021

- Available at [www.differentiatedservicedelivery.org](http://www.differentiatedservicedelivery.org)
- Satellites, symposiums, oral abstracts, late breakers and lots of posters

## Two conference symposia

Don't wait - integrate! How COVID-19 has highlighted the need for HIV services to be person-centered

The Phoenix rises: How COVID-19 has accelerated differentiated service delivery for HIV treatment

## LIVE SESSIONS (Satellites, symposiums and late breakers)

### Sunday, 18 July 2021

- [Pivoting HIV prevention during a parallel pandemic](#) Symposium, Channel 4, 14:00- 14:50 (UTC+01:00)
  - Differentiated PrEP delivery - from pilots to pushing towards the global PrEP targets - Kimberly Green (PATH, Vietnam)
- [Don't wait - integrate! How COVID-19 has highlighted the need for HIV services to be person-centered](#) Symposium, Channel 2, 15:00-15:50 (UTC+01:00)
  - Integration of family planning services into DSD for HIV treatment - results from 12 facilities in Kenya and Tanzania - Cathrien Alons (Elizabeth Glaser Pediatric AIDS Foundation, United States)
  - Providing HIV, diabetes and hypertension treatment refills outside of health facilities in South Africa - Zukiswa Pinini (National Department of Health, South Africa)
  - DSD for HIV and TB - the role of DSD for TB treatment - Cuc H. Tran (Centers for Disease Control and Prevention, United States)
- [What's new in the WHO Consolidated HIV guidelines - prevention, treatment, monitoring & service delivery](#), Satellite, Channel 1, World Health Organization, 16:00- 17:30 (UTC+01:00)
- [Leveraging the Lessons of Differentiated Service Delivery to Provide High-Quality Integrated Maternal and Child Health services](#) Satellite, Channel 3, ICAP at Columbia University, 19:00-20:30 (UTC+01:00)
- [What's new in DSD for HIV treatment: From WHO recommendations to reality](#) Satellite, Channel 3, The IAS - International AIDS Society - in collaboration with the World Health Organization, 21:00-22:30 (UTC+01:00)

### Monday, 19 July 2021

- [Paving the road for new PrEP products: The promise of differentiated, simplified, and decentralized delivery to maximize the potential of new PrEP products](#), Satellite, Channel 2, 08:30- 09:30 (UTC+01:00)
- [The Phoenix rises: How COVID-19 has accelerated differentiated service delivery for HIV treatment](#) Symposium, Channel 2, 10:00-10:50 (UTC+01:00)
  - Expanding eligibility to increase access to DSD for HIV treatment in Ethiopia -Mirtie Getachew (Federal Ministry of Health, Ethiopia)
  - Let's take going virtual viral - moving services online in Thailand - Reshmie Ramautarsing (Thai Red Cross AIDS Research Center, Thailand)
  - More than just longer refills - the need for community-based and community-led services- Wamee Jallow (International Treatment Preparedness Coalition (ITPC), Botswana)
- [Men and HIV in sub-Saharan Africa: Men as healthcare providers, peers in service delivery and patients](#), Satellite, The IAS- International AIDS Society, Channel 3, 17:00- 18:00 (UTC+01:00)
- [Differentiated HIV Services for Mobile, Migrant and Displaced Populations](#), Satellite Channel 4, ICAP at Columbia University, 19:00-20:30 (UTC+01:00)
- [Differentiated Service Delivery and COVID-19: Resilience, Innovation and Lessons Learned](#), Satellite, Channel 3, ICAP at Columbia University, 21:00-22:30 (UTC+01:00)

# COMING SOON

- COVID-19 adaptations pertaining to DSD across the HIV care continuum
- Original research and short reports, with a particular emphasis on operational research and implementation science

"The impact of COVID-19 on differentiated service delivery for HIV"

**IT'S TIME  
TO DELIVER  
DIFFERENTLY**
